NANDU SIVADAS

Aspiring Cloud & DevOps Engineer

Kottayam, Kerala, India | +91 7012861796 | nandusivadas98@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Cloud & DevOps fresher with hands-on internship experience in AWS, Linux, Ansible, Docker, Git/GitHub, CI/CD, Terraform, Jenkins, Prometheus, and Grafana. Experienced in infrastructure automation, application deployment, Linux administration, AWS networking, monitoring, security, and troubleshooting. Seeking an entry-level Cloud/DevOps role to apply and grow these skills in a production environment.

SKILLS

- **Cloud & AWS:** AWS (EC2, VPC, IAM, S3, EBS, EFS, RDS, Route 53, Lambda, EventBridge, SNS, CloudWatch, Auto Scaling, ALB, NLB, NAT, CloudFront, AWS CLI)
- **Linux & System Administration:** Red Hat Enterprise Linux (RHEL),User & Group Management, File Permissions, SSH, Package Management, Systemd, Firewall, SELinux, LVM, Cron, Shell Scripting
- **DevOps & Automation:** Ansible, Docker, Docker Compose, Terraform, Jenkins, CI/CD, Configuration Management, Infrastructure Automation
- **Version Control:** Git, GitHub
- **Monitoring:** Prometheus, Grafana
- **Programming & Scripting:** Python, Bash/Shell Scripting
- **Databases:** MySQL, MariaDB
- **Networking & Web Servers:** TCP/IP, DNS, SSH, Apache HTTP Server, Nginx, Firewalld, SSL/TLS
- **Operating Systems:** RHEL, Ubuntu, Astra Linux, Windows

PROJECTS

RHCE Capstone Project – Enterprise Linux Infrastructure Automation

Tech Stack: RHEL, Ansible, AWS EC2, Apache, MariaDB, NFS, HAProxy, SELinux, Firewalld, Prometheus, Grafana, Git

- Automated enterprise Linux infrastructure across multiple AWS EC2 servers using Ansible playbooks, roles, inventories, variables, handlers, and Jinja2 templates.
- Configured Apache web servers, MariaDB database, NFS file sharing, and HAProxy load balancing for a multi-server environment.
- Implemented Linux security hardening using SELinux, Firewalld, SSH key-based authentication, and restricted direct root login.
- Implemented server monitoring and centralized logging using Prometheus, Node Exporter, Grafana, and rsyslog.
- Automated website and database backups using Ansible and scheduled recurring backups with Cron.

Automated WordPress Infrastructure Deployment using Ansible

Tech Stack: AWS, EC2, Linux, Ansible, Nginx, PHP, MariaDB, WordPress, Git

- Automated end-to-end deployment of a LEMP-based WordPress application on AWS EC2 using reusable Ansible Playbooks and Roles.
- Configured Nginx, PHP-FPM, MariaDB, SSL, and SFTP to deliver a secure, production-style web hosting environment.
- Replaced a multi-step manual server setup with a single automated playbook run, cutting repeat-deployment time from hours to minutes.

AWS Infrastructure Automation using Ansible

Tech Stack: AWS EC2, Amazon Linux, Ansible, Docker, Git, Apache, SSH

- Built a 3-node AWS infrastructure (1 control node, 2 managed nodes) using SSH key-based authentication.
- Automated Apache installation and configuration across all managed nodes using Ansible Playbooks and Roles.
- Recreated the entire environment in a second AWS Region from version-controlled configuration, validating the setup's portability and repeatability.

EXPERIENCE

Cloud & DevOps Intern

Jan 2026 – Present

- Worked with **AWS cloud infrastructure** including EC2, VPC, IAM, RDS, Route 53, EBS, EFS, NAT Gateway, Security Groups, Lambda, CloudWatch, and SES.
- Deployed and configured **Linux web applications** using Apache, Nginx, PHP, and MariaDB on RHEL/Amazon Linux, including virtual hosting and dynamic website deployment.
- Implemented **AWS networking, storage, and high-availability solutions** using public/private subnets, NAT Gateway, EBS Multi-Attach, EFS shared storage, Application Load Balancer, and Auto Scaling.
- Performed **Linux system administration, troubleshooting, and security** including log and journal monitoring, firewall configuration, Security Groups, boot troubleshooting, and Astra Linux recovery.
- Practiced **DevOps automation and CI/CD** using Ansible, Docker, Ansible Navigator, Git/GitHub, and Jenkins for automated infrastructure and application deployment.

Studio Administrator & Multimedia Designer

2020 – 2025

- Managed daily studio operations and cross-team workflow, delivering client projects on schedule.

CERTIFICATIONS

- Red Hat Certified System Administrator (RHCSA) — In Progress
- Red Hat Certified Engineer (RHCE) — In Progress
- AWS Certified Solutions Architect – Associate — In Progress

EDUCATION

Bachelor of Science, Mathematics with Computer Science

BVM Holy Cross College, Cherpunkal - Affiliated to MG University, Kerala | **CGPA: 6.0 / 10**

CORE COMPETENCIES

Cloud Computing • Linux System Administration • DevOps • CI/CD • Infrastructure Automation • Infrastructure as Code (IaC) • Networking & Security • System Troubleshooting.
